SIMPLY AMAZING – EVERY PULLTAB COUNTS

Every pulltab counts, and they do add up. And for anyone who thinks that simple little pulltabs don't add up, here's what 756 pounds of pull tabs looks like.

So what do you do with 756 pounds of pulltabs? If you are PTFC, you call Montgomery Scrap Corporation. With PTFC since our inception, Montgomery Scrap has been an incredible supporter of the organization. They took in our first small collection of tabs and they have been with us and helping us ever since. In this case, with the help of Jason (pictured below) they picked up the tabs and weighed them on the spot. And while Montgomery Scrap has been with us since the beginning, thanks to our alliance with ISRI (the Institute of the Scrap Recycling Industry) there are recycler-members of ISRI around the country who will take in collected pulltabs for PTFC. In fact we now have volunteers collecting tabs in 45 states, not to mention military bases at home and in Iraq. So in conjunction with companies like Montgomery Scrap and the other ISRI members who are assisting us, we can say that every pulltab counts and they do, truly, add up.
