ONE BY ONE – THEY ALL ADD UP

So often we write about the amazing results our volunteers obtain for PTFC. Whether it's the students at our wonderful schools like Heritage Elementary or Samuel Beck Elementary in Texas or Dynard Elementary in Maryland our volunteers inspire and motivate us. But we cannot afford to lose sight of the value that every volunteer collector brings to our efforts. From the neighbor that leaves a sandwich baggie or small box of tabs outside the door of our Executive Director, or the family that collects tabs from the cat food cans (at the direction of their cat) and sends them to us, every tab counts. And they all add up.

Proof of this is that we recently turned in **OVER 504 POUNDS** of tabs to our local partner Montgomery Scrap Corporation. These were the sum of small collections and yet, one by one the tabs added up and NIH and NIH Charities will be the proud beneficiary of the efforts of each of us. So keep collecting tabs, one by one they become pound by pound and dollar by dollar. And we are all better for the effort.
